

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-14. (Canceled)

15. (Previously Presented) A medical data recording method comprising:
receiving medical data through a software module and parsing patient
identification information and study information from the received medical
data,
storing the parsed patient identification information and parsed study information,
noting the end of the received medical data through the software module for each
patient,
creating a job containing medical data, medical data image viewing software, and
a print file for an autoloader control software, the print file having the
stored parsed patient identification information and the stored parsed
study information,
submitting the job to the autoloader control software, and
recording a disc based on the job such that the medical data image viewing
software is recorded on the disc along with the medical data and printing a
template containing the stored parsed patient identification information
and the stored parsed study information on the disc to label the disc.

16. (Previously Presented) A medical data recording method as in claim 15 further
comprising a step of,
loading the viewing software which automatically loads and displays the medical
data after disc insertion in a computer.

17. (Canceled)

18. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,
backing up the medical data on a disc .
- 19-24. (Canceled)
25. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,
processing the received medical data to comply to DICOM standards.
26. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,
storing the job after the job has been created.
27. (Previously Presented) A medical data recording method as in claim 26 further comprising a step of,
deleting the job after submitting the job to the autoloader control software.
28. (Previously Presented) A medical data recording method as in claim 27 wherein deleting the job occurs automatically after recording of the disc has completed.
29. (Previously Presented) A medical data recording method as in claim 15 wherein creating the job comprises utilizing a print file that includes a print template and print merge data.
30. (Previously Presented) A medical data recording method as in claim 15 wherein noting the end of the received medical data for each patient comprises utilizing a time out period.
31. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a CD.

32. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a disc having a format selected from a group consisting of: CDR, CDRW, DVD-R, DVD-RW, and DVDRAM.
33. (Canceled)
34. (Canceled)
